

## INREV Fund Valuation and Reporting course

This INREV practical one-day introductory course outlines the key elements in fund valuation and reporting in line with the revised INREV Guidelines to help you understand and replicate best practice in this area.

The course will address the revised INREV Guidelines focusing on their approach, adoption and changes from the previous INREV Guidelines such as an introduction to the Integrated Reporting Framework with an overview of the best practice annual reporting disclosures.

The course will take an in-depth look at the implications of using INREV Net Asset Value (NAV) with an explanation of the adjustments as well as calculation examples.

It will also explain INREV fee metrics including the INREV Total Expense Ratio.

The course will be of interest for investors, fund managers as well as advisors who play a central role in the preparation or analysis of fund reports.

If you wish to attend this training, please register online via our website www.inrev.org
