

# ENGEL varysoft Demonstration

Dear Ladies and Gentlemen,

You were already given the possibility to view our **ENGEL varysoft technology** in the course of the K'2013 show in Düsseldorf. Thereby we combine the processes in mould graining of foils, injection moulding and foaming with PUR to a single technology compound. Target is the one-shot-procedure for automotive softtouch parts.

Together with the foil producer Benecke-Kaliko, we have recently put a lot of effort in further optimizing the process for European foils. As a result, we are very pleased to invite you now to our **ENGEL varysoft demonstration** run at the ENGEL large machine factory in **St. Valentin (Austria)**, where we want to present the current development status to you.

We have reserved the following date exclusively for you in order to demonstrate the ENGEL varysoft technology and to have some interesting conversations.

**Proposed date** March 25th, 2015 | 08.30 a.m.

If the above mentioned date is not convenient for you, please do not hesitate to contact us so that we can propose an alternate date. Kindly inform Ms. Daniela Thaller by Monday, 2nd March 2015 at the latest, if you are participating in our ENGEL varysoft demonstration and if the proposed date is suitable for you (daniela.thaller@engel.at; Tel: +43 (0)50 620 3102).

We are looking forward to welcome you at the ENGEL varysoft demonstration run in St. Valentin.

Best regards,

**ENGEL**  
be the first.
